Palos Verdes Peninsula Land Conservancy

invites you to become an intern

2017

vegetation monitoring intern

Description

Help the Conservancy collect important data on the Preserves to conserve our rare plant and animal species! A vegetation intern will work under the direction of the Stewardship Associate to help collect data in the field using transect surveys of habitat restoration areas. Participants will receive training on standard monitoring techniques, gain field experience in identifying local plant species, and gain special access to restoration areas during monitoring activities. Previous monitoring experience is not required.

Project Leader

Josh Weinik,
Stewardship Associate

To Apply

Please apply at: [www.pvplc.org/_about/employment.asp](http://www.pvplc.org/about/employment.asp) or send with a cover letter and resume to:
