Welcome
Legacy Circle

Adrienne Mohan
Executive Director
Palos Verdes Nature Preserve

1,400 acres of protected natural lands comprised of 10 reserves including the 64 acre Abalone Cove Reserve
ABALONE COVE RESERVE

The Reserve contains a State Ecological Preserve, two beaches (Abalone Cove and Sacred Cove), tide pools, bluffs, crisscrossing trails and two promontories, Portuguese and Inspiration Point, framing Sacred Cove.
The first restoration project undertaken after the formal adoption of the Natural Communities Conservation (NCCP) Plan under which the City of RPV partners with the Conservancy as habitat manager of 1,400 acre Palos Verdes Nature Preserve.
ABALONE COVE RESERVE

INTERPRETIVE SIGNAGE INSTALLATION

Educational and safety signage at all trail entries
ABALONE COVE RESERVE

RESTORATION SITE MAP
ABALONE COVE RESERVE

SITE PREPARATION

Includes non-native plant species removal, native planting, seeding, supplemental watering, maintenance, and monitoring.
ABALONE COVE RESERVE

SITE ACTIVITIES

Removal of invasive like acacia, above ground pipes and installation of temporary drip irrigation
Plants installed will mimic the natural distribution and vegetation mosaic of adjacent healthy habitats.
ABALONE COVE RESERVE

INVASIVE AND OBSTRUCTIVE TREE REMOVAL
RESTORATION SITE PLANTING

NATIVE PLANTS FROM COASTAL SAGE SCRUB HABITAT COMMUNITY

Lupine, branching Phacelia, CA Poppy
The 13 acres restoration project will benefit local flora and fauna as well as improve the beauty of the site.

Two special-status species, the Coastal California gnatcatcher and the Cactus Wren, will benefit from the plant species installed in the project, and which they depend on for survival.

Host plants for the federally endangered El Segundo and Palos Verdes blue butterflies will be planted to provide habitat for these struggling species.
