2018

third grade naturalist Docent Training

Saturday October 6, 2018

9:00am - noon

White Point Nature Center

1600 W Paseo Del Mar San Pedro CA 90731

The Third Naturalist Program offers docent volunteers a wonderful way to share with young children their love for the Peninsula's natural environment and to increase their own knowledge in the process.

Program Description

Docents lead four hands-on, interactive lessons in one nearby classroom, teaching children about the natural environment of the Peninsula (native plants, animals, and geology) and about the culture of the Tongva people who thrived here for ten thousand years. A culminating fieldtrip to a local open space brings the classroom learning to life in the real world. No experience need. Docents are provided with training and materials.

"Docents develop close ties with their students, teachers, and schools. It isn't unusual for a docent to work with their school for 5, 10, or even 20 years. It's rewarding work."

Connie Smith
Director of Education, PVPLC
